Thank you for purchasing SpikeTaro.

This manual shows SpikeTaro's installation and uninstallation methods to your computer.

## 1 Required environment

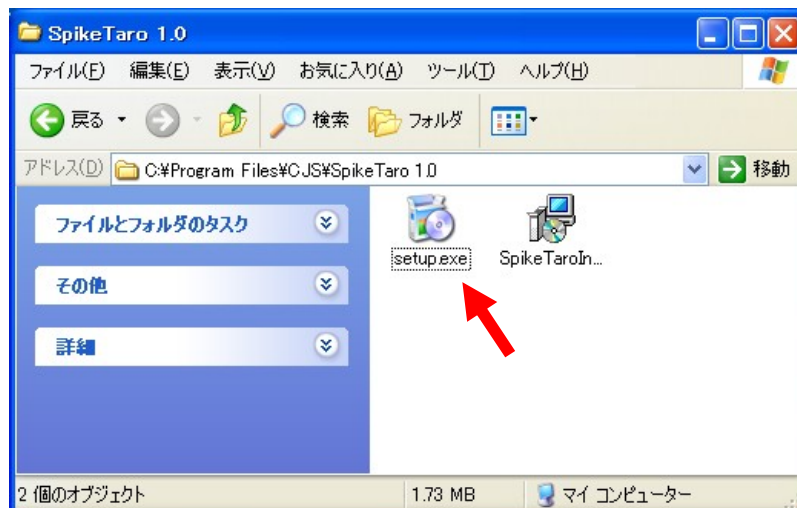

SpikeTaro works under the following environment.

	Environment
OS Type	Microsoft Windows 7 (64, 32 bit), Vista (64, 32 bit), XP SP2 or later.
Memory	2 GB or more. (NOTE)
CPU	Intel(R) Core(TM)2 Duo 1 GHz or more.
Others	Internet connection is required for installation.

(NOTE) The amount of data SpikeTaro can process is dependent on the memory amount of the environment. If a lot of memories can be used, large data can be processed.
